

HIGH PERFORMANCE CRANE ROPES

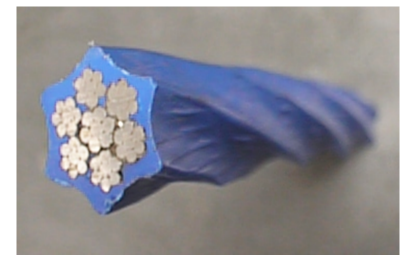

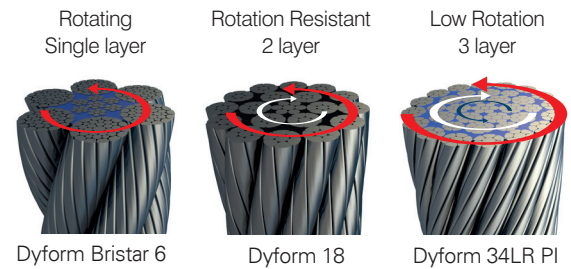

Franklin Offshore Australia and Bridon-Bekaert have joined together to offer the Bridon Range in crane ropes to the Australian market. Bridon have been manufacturing wire ropes for more than 100 Years and are the world leading specialist's in the manufacture of High Performance wire ropes.

They lead the field in engineered superior rope solutions. Manufacturing unrivaled products developed specifically to minimize ongoing operating costs & maximize productivity.

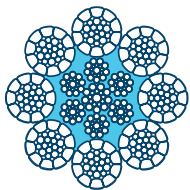

Bridons range of high performance crane ropes include the following:

- **Dyform Bristar 6**
Compact 6 Strand Rope with Bridon's 'Bristar' Plastfill Core for reduced internal friction and superior wear & abrasion resistance.
- **Dyform Bristar 8**
Flexible, compact 8 Strand Wire Rope with Bridon's 'Bristar' Plastfill Core, Superior crush resistance, enhanced bend fatigue & long life.
- **Dyform Bristar 6x19 Class to API 9A**
Conventional 6 Strand compact Wire Rope with Bridon's 'Bristar' Plastfill Core, Superior crush resistance, increased bend fatigue, reduced internal friction.~
- **Endurance Dyform 18**
Rotation Resistant, High Breaking force compact 18 Strand wire rope
- **Dyform 34LR**
Low Rotation, High Strength compact 34 Strand wire rope.
- **Endurance Dyform 34LR PI**
Low Rotation, High Strength compact 34 Strand wire rope with Plastfill core, Superior crush resistance & long service life.

For further information on the complete range of Bridon Wire Ropes please contact our offices.

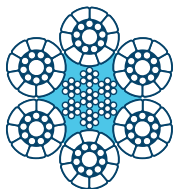

Bridon 'Bristar' Plastfill Core

Dyform Bristar 8

The Dyform Bristar 8 is ideal for Boom hoist and Pendant applications providing superior crush resistance with low stretch.

The unique Bristar core further enhances fatigue performance beyond that of the standard Dyform 8. Available with Tensile Strengths from 1960 to 2160 N/mm²

Dyform Bristar 6x19 Class to API 9A

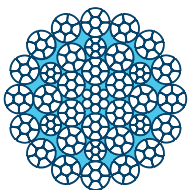

The Dyform Bristar 6x19 six-strand drilling lines deliver excellent ton-mile performance. The pinnacle of drilling line performance is provided by our unique Bristar core drilling lines.

Available in Ordinary Lay & Langs Lay

Endurance Dyform 18

The Endurance Dyform 18 Wire Rope is ideal for crane rope applications, most notably Telescopic mobile cranes, Mobile lattice boom cranes, Dockside cranes, Ship cranes & Overhead hoists/gantry cranes. The Dyform Construction offers a rotation resistant wire rope that has reduced sheave wear and a long service life. Available in Ordinary Lay & Langs Lay

Endurance Dyform 34LR PI

Endurance Dyform 34LR PI multi-strand ropes are recommended for high lifting operations. With exceptional 'low rotational' properties and a high steel fill factor it provides high strength, crush resistance and low stretch. The engineered polymer core further enhances fatigue performance beyond that of the standard 34LR. Available with Tensile Strengths from 1960 to 2160 N/mm²
